DVD DUPLICATION

High Speed DVD Duplication from your supplied Master Disc using only quality Grade “A” DVD-R/+R Disc Media that offers excellent performance and reliable copying of the original material together with good archiving capabilities. During our research, we test various disc manufacturers products to ensure good colour reproduction and ink retention properties which often you find cheaper discs produce a poor result.

The table below shows our duplication pricing structure for up to 500 pcs of DVD media printed with simple text in a single colour or full colour specification. A Protective finishing lacquer can also be added if required.

For regular repeated product orders, we can also produce Litho or Screen printed Blank Media discs for an extremely high quality print finish.

We can also supply your finished work in quality sleeves or library cases and can include cellophane wrapping if required. (See second page for details)

We recommend that for higher quantities than that shown below, DVD’s should be “Replicated” using a Glass Master process and we can offer you a quotation for DVD Replication where further DVD Authoring and a DLT (Digital Linear Tape) Master may be required.
