WORLD TELEVISION STANDARDS CONVERSION

We can convert any of the following Video Tape format footage to any World Television Standard i.e. PAL to NTSC or SECAM / NTSC to PAL or SECAM etc.

Formats we support are as follows: VHS / Mini DV / DV-CAM / DVD

We can also produce DVD Video for the NTSC (USA, Canada, Japan) Markets for further details please call us to discuss your requirements.

The following prices are for straight copy conversion of video footage per tape or disc based formats.
(see note below)

Original Duration	Amount
1 to 30 minutes of footage	£10.50
31 to 60 minutes of footage	£15.75
60 to 90 minutes of footage	£18.90
91 to 120 minutes of footage	£22.25
121 to 150 minutes of footage	£26.25
151 to 180 minutes of footage	£29.50
180 to 240 minutes of footage	£36.75

Note on Converting DVD PAL to DVD NTSC for USA / Canada / Japan

Converting DVD PAL footage to NTSC can be done providing no “menus” are present on the original disc and only a simple “Insert and Play” type product of the “video footage only” is required.

If a Menu Structured Disc is needed, this will require complete re-authoring of the material for the NTSC market as the menu sizes are totally different on an NTSC structured disc to that of a PAL disc.

Any video footage contained within the menus will also require conversion to NTSC.

Additional DVD Authoring can be done and will be charged at our normal Corporate Rates, please call us for further information and pricing on this service.
